

# ATS1850

## ATS Integrated Event Recorder, NFA2P, 1Mb, zeropower RAM

### Product Overview

---

The ATS1850 is an Integrated Event Recorder, designed to meet the highest security level for NFA2P. It provides non-volatile backup of history logs by a special zeropower RAM. In the event that the panel is no longer usable, the event recorder module can be removed and replaced in another panel for viewing of history events from the original panel. The panel can also detect if the event recorder has been replaced with a different event recorder and generate an Event Log Substitution message to the log. The Event Recorder is non-volatile and is not erased when the panel is defaulted!

### Details

---

- Non-volatile backup of history logs
- Memory capacity - 1 Mb

# ATS1850

ATS Integrated Event Recorder, NFA2P, 1Mb, zeropower RAM

## Technical specifications
